A foundation for truly integrated R&D workflows

The Benchling Notebook serves as the starting point for fully integrated R&D workflows. It automatically appends results to sequence and sample files, supports in-line links to any Benchling file, generates entries for any workflow or assay requests across groups, and more.

A repository for institutional knowledge

Benchling's superior search features mean that you'll never lose or duplicate data or results with expensive, scattered databases again. The Notebook's unparalleled usability encourages scientist adoption, reducing average time to data entry from weeks to hours.
